EDUCATION

Bachelor of Engineering – Mechanical Engineering

2020 – 2024 | Score: 73%

Jawaharlal Nehru National College of Engineering, Shivamogga

Java Full-Stack Developer Certification

Apr 2025 – Apr 2026

NIIT Institute

Coursework: Core Java OOP · SQL Database Design · React.js · REST API Architecture · Microservices Testing · Full-Stack Web App Development · Generative AI Fundamentals

KEY PROJECTS

Food Delivery Web App – Full-Stack Platform

Tech Stack: React.js · Core Java · Spring Boot · MySQL · JWT · REST API | Team: 4 | Role: Full-Stack Developer

- Developed a production-grade food delivery platform with secure JWT authentication, payment gateway integration, AI chatbot support, and a role-based admin dashboard — delivering end-to-end functionality as a fresher trainee.
- Built a fully responsive React.js frontend with dynamic routing, cart management, and real-time order status updates — ensuring seamless UI/UX across mobile, tablet, and desktop.
- Designed and implemented RESTful APIs for user authentication, menu management, and order processing; validated 100% of endpoints using Postman and REST Assured.
- Collaborated in a 4-member Agile team with Git branching, pull requests, and code reviews — maintaining modular, production-quality code throughout the project lifecycle.

Zomato-Inspired Food Delivery UI Clone – Responsive Frontend

Tech Stack: HTML5 · CSS3 · JavaScript | Team: 4 | Role: Frontend Developer

- Designed a pixel-accurate, cross-device responsive interface using CSS Grid and Flexbox — compatible across mobile, tablet, and desktop viewports.
- Implemented interactive JavaScript features: dynamic content rendering, navigation bar behaviour, and video thumbnail sections.
- Optimized asset structure and CSS for improved page load performance; delivered using clean, modular practices within a collaborative 4-member team.

TECHNICAL SKILLS

Programming Languages: Core Java, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Spring Boot (fundamentals), REST Assured

Testing & QA: REST API Testing, Microservices Testing, Functional Testing, Postman

Databases & Tools: MySQL, Git, VS Code

Concepts: OOP, JWT Authentication, Agile/Scrum, Responsive Design, DOM Manipulation

PROFESSIONAL SUMMARY

Fresher Java Full-Stack Developer with hands-on experience building a production-grade food delivery platform featuring JWT authentication, payment integration, AI chatbot, and an admin dashboard. Proficient in React.js, Core Java, Spring Boot, and MySQL. Skilled in REST API design and testing using Postman and REST Assured. Currently completing a Java Full-Stack Certification at NIIT (2025–2026). Agile team contributor with a strong engineering foundation — seeking an entry-level software engineer role to deliver quality code and grow within a product-driven team.

KEY STRENGTHS

- Completed an end-to-end full-stack application with production-grade features (authentication, payments, AI chatbot) as a fresher trainee — rare for a non-CS graduate.
- Hands-on REST API testing with Postman and REST Assured — strong QA / API tester candidate.
- Cross-disciplinary problem solver: Mechanical Engineering background combined with modern full-stack skills.
- Active GitHub presence with deployed portfolio demonstrating real-world coding output.
